

Jalapeno How To - Bring in processes from Signavio

Why integrate with Signavio?

[Signavio](#) is a dedicated process modeling and management product. For organizations that require complex process modeling capabilities, Jalapeno and Signavio integrate so that Jalapeno holds the process hierarchy and traceability through the operating model and Signavio holds the process detail.

Who can create the integration between Jalapeno and Signavio?

Only Jalapeno users with Admin access will have permission to create and maintain the integration detail between your instance of Jalapeno and Signavio.

Where do I manage the integration between Jalapeno and Signavio?

If you have Admin access, select "Admin Tools" from the User menu in the top right corner of your screen. Note that this will only be available if you are within a Jalapeno model.

Select the 'Integration Tab' and the 'Configuration' sub tab.

How to I configure the integration?

From the Configuration drop down, select 'Signavio Process Manager'.

Enter the Host, User and Token details.

Your Signavio Administrator can provide you with these details.

Jalapeno How To - Bring in processes from Signavio

How do I trigger the import?

Select the “Integration” tab and the “Import” sub tab.

Select ‘Signavio’ from the drop-down.

Under the “Synch/Import” header, you will see a preview of the content that will be imported from Signavio. Click the “Import/Synch” button to complete the import or update.

The screenshot shows the Jalapeno application's integration interface. At the top, there is a navigation bar with tabs: Tools, Mappings, Users, Models, External Hosts, Storage, Classes, Properties, Auto ID, Manage Change Log, and Integration. The 'Integration' tab is currently selected. Below the navigation bar is a sub-navigation bar with Configuration, Import (which is highlighted with a blue background), and Advanced. Under the Import tab, there is a dropdown menu showing 'Signavio Process Manager Model'. The main area of the screen is titled 'Sync/Import' and contains a table with several rows of process data. The table has columns for label, description, author, signavio model type, capsifi type, author company, parent, and a delete icon. The last row of the table has a blue 'Import/Sync' button at the bottom right. A large black arrow points to the 'Import/Sync' button.

label	Description	Author	SignavioModelType	CapsifiType	AuthorCompany	Parent	Actions
Check quantity and quality (Signavio)		Thomas Zimmermann	Business Decision Diagram (DMN 1.1)	CBV:PROCESS	Signavio	Level 3 & 4: Procurement of Parts (Signavio)

Where can I see the imported content?

Within your process hierarchy, imported processes will have '(signavio)' appended to the process name.

Select the process from the process hierarchy, select the 'View' tab and the 'Signavio Diagram' sub tab, and the Signavio revision from the drop down. Your Process flow diagram from Signavio will be available to view.
